PROJECTS

Traveler | HTML, CSS, JS, PHP and MySQL   **March 2023 - May 2023**

- Traveler is a web application designed to facilitate the management of travel and tourism-related activities.
- It provides a user-friendly interface for travelers to browse and book travel packages, and for administrators to manage the system's content and bookings.
- This system has been developed using HTML, CSS, and JavaScript for the frontend, and PHP and MySQL for the backend.

QuizHunt | HTML, CSS, Bootstrap, JS   **July 2022 - Aug 2022**

- QuizHunt is a quiz website that offers quizzes on programming languages such as C, C++, Java, Linux, and operating systems.
- The website is built using HTML, CSS, Bootstrap, and JavaScript.

Weather Application | HTML, CSS, JS   **July 2023 - Sept 2023**

- Designed and implemented a web-based weather application using Java, HTML, CSS, and weather API .which shows current weather by searching the name of the city and we can also get the weekly weather forecast
